

Creative Spotlight - Display Security/Anti-Theft Systems

siffron offers the Security Lockbox with Kwik-Set, a top choice for maintaining product visibility while keeping display items safe and secure. Measuring 24" x 8" x 8", this locking security case features a clear visible front and durable metal sides that provide a strong barrier against potential shoplifters. The lockbox attaches securely to the display shelf via install screws, preventing offenders from removing it easily. Additionally, the clear plastic shield panel gives potentially interested shoppers a clear view of items inside. When customers are ready to make a purchase, they can notify nearby store associates to unlock the security case for them. For more information, contact siffron, 8181 Darrow Road, Twinsburg, OH 44087; www.siffron.com.

Scorpion Security Products' newest patent pending product, Scopi-Can®, is a one-size fits all solution designed to protect a wide range of single-serve canned beverages, whether it be energy drinks or alcohol. This solution will not only reduce shrink, but will help prevent in-store and underage consumption of alcoholic beverages. For more information, contact Scorpion Security Products, 330 N Jensen Rd, Vestal, NY 13850; www.scorpionsecurityproducts.com.

Nashville Display has introduced a security case to protect high-value products. The security case provides full product visibility while deterring theft. The display is designed to fit comfortably in-line on a gondola. For more information, contact Nashville Display, 306 Hartman Drive, Lebanon, TN 37087; www.nashvilledisplay.com.

Trion's Anti-Sweep hook deters thieves and lowers the chance of mass sweeping. Trion's design with a bend in the middle and at the end of the hook ensure customers can only remove one item at a time. Paired with Trion's patented Flip Scan, the Anti-Sweep hooks acts like an industry leading scan hook yet provides the added security against thieves. For more information, contact Trion Industries, Inc., 297 Laird Street, Wilkes-Barre, PA 18702; www.TrionOnline.com.

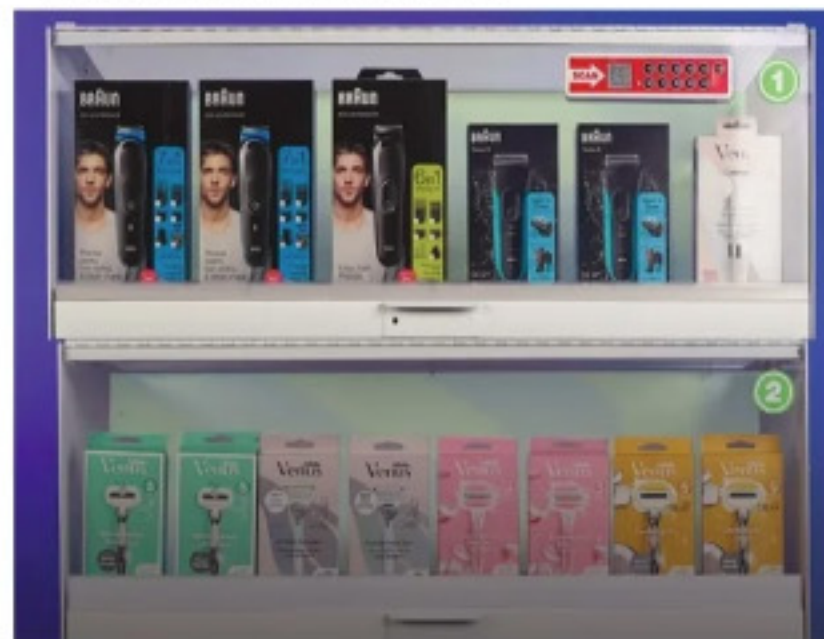

Se-Kure Controls has introduced the J-Hook Handbag Locking Rack. A secure and practical solution for organizing and safeguarding handbags. This innovative product features up to 5 J-Hooks, allowing you to hang and lock up to five different handbags at once. Perfect for retail stores, boutiques, hotel gift shops, etc. The locking mechanism ensures that each handbag stays safe and secure, preventing theft and unauthorized access. With its durable, sleek design, the J-Hook Handbag Locking Rack offers both convenience and security, keeping valuable items organized and protected in a stylish, efficient manner. For more information, contact Se-Kure Controls, Inc., 3714 Runge St., Franklin Park, IL 60131; www.se-kure.com.

siffron offers its Invisi-Shield® system with large panels to protect large items from theft. The large tile design (8" W x 8" H) covers more shelf space and is perfect for protecting oversized merchandise. The sliding panels prevent "shelf sweeping" theft, while providing easy product access for legitimate customers. Crystal-clear "invisible" panels provide an unobstructed view for the consumer. Invisi-Shield installs on the underside of standard retail shelving using the included hardware mounting kit. The Invisi-Shield System also features an audible ratcheting noise as the panels are moved to provide an additional deterrent. For more information, contact siffron, 8181 Darrow Road, Twinsburg, OH 44087; www.siffron.com.

Trion's ScanLock® is a turn-key lock that offers customizable positioning on your display fixture. Trion offers a variety of locking backplates and security plates that mount directly to your display, ensuring your product and fixture don't get stolen. To maintain complete shopability and prevent sweeping, Trion's unique wire bends allows your product to be shopped but require customers to select an item one-at-a-time. For more information, contact Trion Industries, Inc., 297 Laird Street, Wilkes-Barre, PA 18702; www.TrionOnline.com.

ShopperAccess by darko is a shopper-centric, theft-deterrent, mobile technology. This technology does not require an app, AC power or Wi-Fi/Retailer network and simply links with a shopper's mobile device for access to locked merchandise at the point of sale. ShopperAccess's plug-n-play model removes complex in-store implementation, activation, and requires minimal maintenance. The self-service retrieval also reduces shopper (purchase) abandonment, helps with labor efficiencies, and provides a layer of safety for associates. ShopperAccess is adaptable which allows the technology to integrate into existing structures - such as store fixtures, shelf-displays, doors (cooler or restroom) as well as gates and case work. For more information, contact Darko, 26401 Richmond Rd., Bedford Heights, OH 44146; www.darkoinc.com.
