

Pallet Displays 2025

UMIPLAST's innovative quarter, half, and full PALLET DISPLAY SYSTEM is a smarter, reusable, long lasting and greener alternative to traditional cardboard and metal displays. These pallet displays are 100% sustainable, made entirely from recycled plastic and fully recyclable after years of use. The displays reduce costs in logistics, warehousing, and freight, and also enhance brand presence at the point of sale. For more information contact Umiplast, 3720 N37 Terrace, Hollywood, FL 33021 www.umiplast.com.

The newly released PFP-3 Pallet Floor Protector, a patented innovation, is designed to shield flooring from scratches, dents, and ink stains commonly caused by pallet contact. Scratches, gouges, and even ink stains from colored pallets not only diminish store appearance but also lead to costly repairs. The PFP-3 creates a strong and durable barrier between pallets and store floors. For more information, contact Clip Strip Corp., 343 S. River St., Hackensack, NJ 07601; www.clipstrip.com.

Testrite Visual has introduced Stellar Pallet Stands. The telescopic tubing pallet stands up to 78" high. This makes it so easy to use use adjustable pallet stands and adjust the height of the hardware as it maintains a professional aesthetic. They are conveniently available as a single sided pallet stand or a double sided pallet stand. They can be ordered as a single arm pallet stand or a double arm pallet stand. The all metal pallet stands are made from high quality all metal construction with a reinforced steel base for added stability. For more information, contact Testrite Visual, 216 South Newman St., Hackensack, NJ 07601; www.testrite.com.

Pantalone's Tequila used this digital pallet display to secure prime floor space at Total Wine & More. The Digital Pallets, adorned with temporary toppers, showcase a range of Pantalone's flavors and brand content featuring founders Matthew and Camila McConaughy. The eye-catching LED screens showcase the brand's playful spirit, inviting customers to engage and explore. These digital pallet displays were created by Outform, 82 NE 26th St., Miami, FL 33137; www.outform.com.

For its seasonal quarter pallet displays, Wonderful® Pistachios wanted a stronger, more secure shipping base to minimize transit damage. The solution involved gluing the display to Litco's Engineered Molded Wood™ pallets. These pressed wood pallets are twice as stiff as new or repaired wood pallets. They resist flexing, maintain structural integrity, and minimize transit vibrations, so displays arrive intact and retail-ready. Seamless and nail-free, Litco pallets protect retail floors from scratches and reduce employee injury risk. Certified by Cradle-to-Cradle® and USDA BioPreferred®, they also support sustainability goals. For more information, contact Litco, One Litco Drive, Vienna, OH 44473; www.litco.com.

Colgate-Palmolive Canada used this pallet display to position its Irish Spring brand at Costco Canada as a twin-pack pump, aligning with Costco's sustainability goals. Traditionally, club retail packs use shrink film, plastic multipack handles and folding boxboard or corrugate cartons. Hughes-Decorr developed an innovative, eco-friendly solution. This display features the EcoPackLock™, a one-piece E-flute die-cut folder that securely locked the two bottles together. For more information, contact Hughes-Decorr, 249 Courtland Ave., Concord, Ontario Canada L4K 4T2; www.hughes-decorr.com.

June/July 2025

Windsor set out to create a bold in-store presence that would turn heads, spark interest, and ultimately drive summer sales. This eye-catching pallet display not only delivered strong branding and shelf impact, but it also drew shoppers in with its rustic design that celebrates the product's Canadian heritage. Designed with scalability and flexibility in mind, the display seamlessly adapts to a variety of retail environments, ensuring consistent impact across different store formats. This display was created by Imagine, 1000 Valley Park Dr., Shakopee, MN 55379; www.theimagegroup.com.

Kinter offers adjustable pallet guards to help keep shoppers safe. Pallet Guards reduce the risk of customer trips and/or falls, enhance the appearance of your store and protect merchandise from being damaged. Adjustable panels fit a wide range of pallets from 28 inch to 54 inches in size. Four pre-assembled panels are 6 inches high each. Removable and reusable time and time again. Easy to set up and extend with no tools required. Selling straight from the pallet made safe, secure and appealing. For more information about Kinter Pallet Guards, contact Kinter, 3333 Oak Grove Avenue, Waukegan, IL 60087; www.kinter.com.
